

List of changes being made to ISV test service on 6 August 2008

1. TPVS is returning an incorrect format for the GatewayTimestamp for SDLT submissions.

Currently the format is being returned from TPVS as yyyy/mm/dd hh:mm:ss

However it should be shown as xsd date format which is yyyy-mm-ddThh:mm:ss.sss

2. TPVS is reporting error 338 & 281 in error.

The errors state

'Error 338 – Box 18 cannot be completed if box 2 of SDLT1 is F or O'

'Error 281 – Box 20 should not be completed if field 2 SDLT1 is F or O'

When SDLT 1 box 2 is O and two elements within the submission are being sent empty – 'Lease Details' and 'Additional Lease Info' the above errors are being reported.

The reported errors relate to the completion of SDLT4 box 18 and SDLT4 box 20, but these elements have not been completed and therefore these elements are reported incorrectly.

3. The wording of the IRmark success_response is incorrect and currently reads as

'The Inland Revenue has received your *****Online submission ***** ref*****. The associated IRmark was:*****. We advise you to keep this receipt in both electronic and hardcopy versions for your records. You may wish to use them to identify your submission in the future.

The above statement will be changed to read:

'HM Revenue & Customs has received your ***** Online submission ***** ref *****. The associated IRmark was:*****. We advise you to keep this receipt in both electronic and hardcopy versions for your records. You may wish to use them to identify your submission in the future.

4. The IRmark in a successful response in TPVS is terminated with a carriage return / line feed.

The following is what is currently displayed.

'The Inland Revenue has received your Stamp Duty Land Tax Online submission %1ref:2%.
The associated IRmark was: %3
We advise you to keep this receipt in both electronic and hardcopy versions.
You may wish to use them to identify your submission in the future.'

Where the substitution is as follows,

%1 is the submission ref

%2 is the tax / form ref

%3 is the IRmark no

The '\n' is the line feed / carriage return.

The actual wording will be changed to the following

'HM Revenue & Customs has received your Stamp Duty Land Tax Online submission N127/CC ref: 500000000MH. The associated IRmark was: S3EC7XWELLXR3J4RMQWPANFVFDTXXBC. We advise you to keep this receipt in both electronic and hardcopy versions for your records. You may wish to use them to identify your submission in the future.'

5. The wording of SDLT error message 83 being returned from TPVS is incorrect.

Error 83 should read 'As box 2 contains F, O or A box 25 must be left blank'. However, TPVS is returning 'As box 2 contains F, O or A box 24 must be left blank'.

6. SDLT Business rule 87 is not reporting correctly. The BVR's state that the field must correspond with the list of Local Authority codes numbers supplied but it has been found that TPVS is allowing any combination of Local Authority numbers up to 0099 ie 0000 to 0099 are not valid Local Authority numbers, but TPVS is allowing them and error 87 is not being reported.

The code is being amended so that Local Authority codes that are present in the list of codes will pass validation and any other codes will fail with error 87.
