

Documentation error in v1.0 of RIM artefacts for 2009/10 In Year Forms

The mov-specDoc-v1-0.pdf and mov-2010-v1-0.xsd files within the 2009/10 RIM Artefacts include the following descriptions in relation to values A, B and C of the enumerated values on the /P46Expat/@statement:

element: P46Expat XML

path	/P46Expat
------	-----------

attribute: Statement XML

base	CharsetG
path	/P46Expat/@Statement
cardinality	1..1
description	P46Expat statement
example	A
id	[10]

enumerated values:

A	Operate emergency code on a cumulative basis
B	Operate emergency code on a non-cumulative Week1/Month1 basis
C	Operate code BR

These descriptions do not match the wording on the P46(Expat) form, and should be shown as:

A - Live in the UK for more than six months

B - Live in the UK for less than six months

C - Working inside and outside the UK, but living abroad

This does not affect the validation of submissions within the Online channel, and will be corrected in any future updates to the Artefacts. Please accept our apologies for any confusion this may cause.
