Child Benefit Statistics

Geographical analyses

August 2005

Contents	Page
Introduction	1
Table 1 : Families receiving Child Benefit nationally, in each country and in each Government Office Region of England at 31 August 2005	3
Table 2 : Families receiving Child Benefit in each local authority at 31 August 2005	4
Table 3 : Families receiving Child Benefit in each Westminster parliamentary constituency at 31 August 2005	14
Table 3a : Families receiving Child Benefit in each Scottish parliamentary constituency, at 31 August 2005	27

Introduction

These tables show the number of families by size receiving Child Benefit (CB) and the numbers of children grouped by age for whom CB was received at 31 August 2005. A breakdown is provided for each country of the United Kingdom and for each region of England (Table 1), for each county, district and unitary authority (Table 2), and for each Westminster parliamentary constituency (Table 3) and Scottish parliamentary constituency (Table 3a).

Coverage and compilation of the figures

The tables are based on extracts from the CB computer system taken on 31 August and 30 November 2005.

The tables are based on the 31 August extract, but supplemented by extra children born in the year to 31 August 2005 but appearing only in the 30 November scan. (CB claims can be backdated by up to three months). About 40 thousand new families (0.5 per cent) are thereby included, and almost 90 thousand babies in these families or in existing families (0.7 per cent).

Claimants and families - change since August 2004

Couples with more than one child can elect that both partners receive CB, with the children allocated between them. Only the partner with the eldest child will receive the higher payment for the eldest child.

In previous versions of this publication, and in the quarterly statistics, both such claims have been included in the figures. In this publication, however, the family has been included as a single unit containing all the children. This has resulted in the count of recipient families being about 25 thousand lower than the number of recipient claimants. This change has been made to bring the 'family' basis of the statistics in line with the basis for statistics on tax credits and other benefits.

Geographical allocation

For Great Britain (England, Wales and Scotland) geographic referencing was carried out by the Department for Work and Pensions, on behalf of HMRC. For each CB record the correspondence address and postcode data were run through the Neighbourhood Statistics Address Matching software to improve the quality of these fields.

Each record was then assigned to its Census Output Area using the May 2005 All Fields Postcode Directory (AFPD). From this information additional administrative geographical details were determined - these included Government Office Region, Local Authority and Lower Level Super Output Area. Additionally each address was allocated to a parliamentary constituency using the address matched postcode and the AFPD.

The process of assigning geographical information for each family in Northern Ireland was carried out by the Department for Social Development in Northern Ireland (DSDNI). The quality of the address data was improved using Quick Address software, and then the necessary geographical fields were added using the Central Postcode Directory for Northern Ireland.

There were about 15 thousand cases where the exact geographical areas could not be established from the addresses using the software available. The addresses and other data were used to allocate these cases between Northern Ireland and GB, and then to allocate the GB cases to the smallest areas possible. These cases were then allocated to finer areas at random, assuming the same distribution between these areas as for known cases. However, for about 9 thousand of these cases the address contained no useful information; they were allocated at random by this method across the whole of GB.

The Northern Ireland postcode directory failed to indicate the geographical areas for some postcodes. Families with such postcodes, plus those with incomplete address data and allocated to Northern Ireland (see above), are shown under "Northern Ireland not identified" in the tables.

Cases appearing under 'Foreign' are almost wholly within foreign addresses or with "BFPO" appearing in the address. The vast majority are Crown servants serving abroad.

Rounding

The figures have been independently rounded to the nearest 5. This can lead to components as shown not summing to totals as shown.

Comparisons with other Child Benefit statistics

The total number of recipient families, after adjusting for backdated and 'merged' claims (see above) is about 75 thousand (1 per cent) below the estimated number of recipients shown in the quarterly statistics for August 2005. The main reason is that the definition of what constitutes a current CB award varies between the extracts used to generate the figures. Users should bear this in mind when comparing the figures.

Age bands of data on children

For all tables in this publication, figures showing the age of children for whom CB is claimed have been grouped into four age bands. Figures at a local authority level and parliamentary constituency level showing the number of children by single year of age are available on request.

Table 1: Families receiving Child Benefit nationally, in each country, and in each Government Office Region of England, August 2005
