Introduction and key figures

The following tables show the number of families in the United Kingdom in receipt of Child Benefit (CB) at 30 November 2006, and the number of children for whom the benefit was paid. The figures are estimates based on a sample of awards, and are therefore subject to sampling error - see Appendix A.

Table 1.1 shows the trend over time of the number of families claiming CB since May 2000. At the end of November 2006 there were 7.3 million families receiving CB, with 12.8 million children for whom payments were being claimed.

The number of families at November 2006 has increased compared with November 2005. The total number of children has also increased over the same period. For children under 5, there has been an increase from 3.31 million in November 2005 to 3.38 million in November 2006.

There was also an increase in children aged 16 and over for whom CB is claimed in November 2006 compared with the previous year, from 1.31 million to 1.38 million. Part of this increase can be attributed to the new rules from April 2006 for claiming CB for young people in this age group - see Technical Note for more details.

Table 1.2 shows the numbers of families claiming CB by the size of family. In November 2006, 46% of CB families have 1 child and 38% have 2 children for whom the benefit was claimed, compared with 45% and 39% respectively in the previous quarter.

A breakdown by country of residence of CB recipients is shown in **Table 1.3**. There was an increase of over 60 thousand claimants in England in November 2006 compared with November 2005. For Wales, Scotland and Northern Ireland there was little change over the same period.

Table 2 shows how the number of children in the family for whom CB is claimed varies between countries within the UK. 45% of families in England have 1 child, compared with 46% in Wales, 50% in Scotland and 42% in Northern Ireland.

In **Table 3.1**, a profile of the individual year of age of children for whom CB is claimed can be seen. There were 633 thousand children aged under 1 for whom payments were made, compared with 699 thousand for those aged 1. The number aged under 1 is particularly affected by new and revised claims that were not received and processed by the reference date but will later be backdated to before the reference date.

Table 3.2 shows the age of children at 31 August 2006, and therefore the age of children by school year. There were 696 thousand children that were under 1 at this date, compared with 705 thousand for those aged 1.

Chart 2 Children in families of Child Benefit recipients, by age at 31 August 2006, United Kingdom

Technical note

Child Benefit is paid to those responsible for children (aged under 16) or qualifying young people. The latter includes:

- a) those in full-time non-advanced education or (from April 2006) on certain approved vocational training courses and who are under 19, or are aged 19 and have been on the same course since their 19th birthdays. (Note: those reaching 19 up to 9 April 2006 ceased to qualify on their 19th birthdays);
- b) those entered for future external examinations, or are in the period between leaving education (or exams finishing) and the week containing the first Monday in September (or similar dates after Easter and in early January, if earlier), and are not in work (there are slight variations for Scotland);
- c) those aged under 18 who have moved directly from full-time education to being registered for work or training with the Careers service or with Connexions.

Awards are also subject to residence criteria being satisfied.

The numbers shown in the tables are estimates based on a random 5 per cent sample of awards current at the reference date. The extract was taken on the reference date. The figures therefore take no account of new claims, or revisions to claims, that were received or processed after the reference date, even if they are backdated to start before the reference date. Figures based on fewer than 25 cases are shown as "-".

The data extracted for each sample family include details of each child in the family for whom Child Benefit was paid at the extract date. This yields estimates of the total number of children in families receiving Child Benefit, and their characteristics.

There are around 8,100 families allocated to "Abroad". Investigations indicate that the vast majority of these are for families of armed forces or other crown servants serving overseas.

The figures are subject to sampling error - see Appendix A.

Appendix A: Sampling error

The figures in the tables are based on a random 5 per cent sample of families with claims for Child Benefit fully processed by the reference date. The sampling method ensures that the sample cases are representative of all such families on the computer system. The data for the children in these families also comprise a 5 per cent sample of children.

The figures in the tables are therefore estimates, but we know how accurate they are. For example, suppose that there are 100,000 families or children with a particular characteristic (but this number is not known), and that each is sampled with a probability of 0.2. Statistical theory says that there is a 95 per cent probability that the number sampled will lie between 19,752 and 20,248. If we were estimating the total number with the characteristic from the number in the sample, there is therefore a 95 per cent probability that our estimate will lie between 98,760 and 101,240. Approximately, we can then say that, where an estimate of 100,000 is derived from the sample, the true figure lies within 1,240 of the estimate, with a 95 per cent probability. That is, the width of the "95 per cent confidence interval" for the estimate is 1,240, or 1.2 per cent, of the estimate itself.

The width of the confidence interval varies with the size of the estimate, as shown in the table below.

Confidence interval widths for estimates

Estimated value	<u>95% confidence interval</u>	<u>Confidence interval as % of the estimate</u>
'000	'000	
1	± 0.3	± 27%
2	± 0.4	± 19%
5	± 0.6	± 12%
10	± 0.9	± 9%
25	± 1.4	± 5%
50	± 1.9	± 3.8%
100	± 2.7	± 2.7%
250	± 4.3	± 1.7%
500	± 6.0	± 1.2%
1,000	± 8.5	± 0.9%

Appendix B: Rates of Child Benefit, 1992-93 to 2006-07

	£ per week		
	Eldest child	Subsequent children	Lone parent ¹
April 1992	9.65	7.80	15.50
April 1993	10.00	8.10	16.05
April 1994	10.20	8.25	16.35
April 1995	10.40	8.45	16.70
April 1996	10.80	8.80	17.10
April 1997	11.05	9.00	17.10
April 1998	11.45	9.30	17.10
April 1999	14.40	9.60	17.10
April 2000	15.00	10.00	17.55
April 2001	15.50	10.35	17.55
April 2002	15.75	10.55	17.55
April 2003	16.05	10.75	17.55
April 2004	16.50	11.05	17.55
April 2005	17.00	11.40	17.55
April 2006	17.45	11.70	17.55

Notes:

1. This was payable instead of the standard eldest child rate to most people bringing up children on their own until 6 July 1998. From that date it has continued to be payable to recipients at that date. It is also payable to lone parents who were receiving the lone parent rate of family premium in Income Support or Jobseekers' Allowance and move into work; and lone parents ceasing to receive a "specified" benefit (Child's Special Allowance for the eldest dependent child; the higher rate of Industrial Death Benefit for the child; or an increase for the eldest dependent child with either Widowed Mother's Allowance, War Widow's Pension, Retirement Pension, Industrial Disablement Pension - which includes Unemployability Supplement - or Invalid Care Allowance).
