Notes on the Table

Percentile points for total income before and after tax, 1992-93 to 2007-08

1. This table gives certain percentile points of the income distribution as estimated from the Survey of Personal Incomes for each survey year shown. The table only covers individuals who have some liability to income tax. The percentile points have been independently calculated on total income before tax and total income after tax.
2. Total income is the sum of all income subject to tax for the year (see the Income tax statistics and distributions introduction). For most types of income this is approximately the same as income that is earned in the tax year but this is not the case for self-employment income (see the notes on the tables for 3.9 and 3.10) and some other kinds of income.
3. For details of the symbols used in this table please refer to paragraph 8 of the notes on Personal Incomes ([link](#)).
