Source: Survey of Personal Incomes

Table updated April 2009

(1) Taxpayers with a marginal rate at the 10% starting rate from an extra £1 of earnings.

(2) Taxpayers with a marginal rate at the 20% lower rate for savings income or the 10% ordinary dividend rate from an extra £1 of earnings.

(3) Taxpayers with a marginal rate at the basic rate from an extra £1 of earnings.

(4) Taxpayers with taxable income above the higher rate threshold.

(5) Taxpayers aged 65 years or older for males and 60 years or older for females (State Pension Age).

(6) Projected estimates based upon the 2006-07 Survey of Personal Incomes, in line with April 2009 Budget Report.

(7) Latest year of survey.

Notes on the Table

a. In response to the need for more information on income tax at country and Government Office Region level, this table replaces the previous table which showed the numbers of taxpayers by country only.

b. For tax years from 2005-06 certain improvements to the calculation of marginal tax rates (MTR) were introduced. From 2005-06 the MTR is calculated after allowances and reliefs given as income tax adjustments (such as married couple's allowance, maintenance payments relief, enterprise investment scheme relief, venture capital trust relief and community investment relief). Prior to 2005-06, the marginal tax rate was allocated before any income tax adjustments were applied.

c. Income tax projections for the years 2007-08, 2008-09 and 2009-10 are based on the Survey of Personal Incomes (SPI), 2006-07.
