Final Table

Notes on the Table

Contributions to personal pensions for employees

1. The figures are derived from returns made by scheme administrators. Due to the simplified regime introduced April 2001 and associated changes in the statistical returns received the data in tables T7.2 and T7.3 will be replaced by that in Table 7.4 from 2001-02 onwards.

2. The above table analyses contributions to personal pension schemes from the three sources to the schemes which are classified as follows:

schemes receiving minimum contributions only;

schemes receiving minimum contributions and contributions from individual employees but not from employers;

schemes receiving contributions from all three sources;

other schemes including those with minimum contributions and contributions from employers (but not employees) and schemes not approved for NIC rebates (which may receive contributions from individuals and/or employers).
