Final table

Notes on the Table

Contributions to personal pensions for employees

1. The figures are derived from returns made by scheme administrators. Due to the simplified regime introduced April 2001 and associated changes in the statistical returns received the data in tables 7.2 and 7.3 will be replaced by that in table 7.4 from 2001-02 onwards.

2. The above table shows the number of personal pension scheme arrangements, including those started in previous financial years which are continuing to receive contributions. An individual may have more than one arrangement, but only one of which can receive contracted out NIC rebates.
