Introduction

What are tax credits?

Tax credits are a flexible system of financial support designed to deliver support as and when a family needs it, tailored to their specific circumstances. They are part of wider government policy to provide support to parents returning to work, reduce child poverty and increase financial support for all families. The flexibility of the design of the system means that as families' circumstances change, so (daily) entitlement to tax credits changes. This means tax credits can respond quickly to families' changing circumstances providing support to those that need them most.

Tax credits are based on household circumstances and can be claimed jointly by members of a couple, or by singles. Entitlement is based on the following factors:

- age
- income
- hours worked
- number and age of children
- childcare costs
- disabilities

[For further information about who can claim please refer to the HMRC website.](#)

Tax Credits are made up of:

Child Tax Credit (CTC)

Brings together income-related support for children and for qualifying young people aged 16-19 who are in full time non-advanced education or approved training into a single tax credit, payable to the main carer. Families can claim whether or not the adults are in-work.

Working Tax Credit (WTC)

Provides in-work support for people on low incomes, with or without children. It extends eligibility to in-work support to people who work 16 hours or more a week and;

- are aged at least 16 and are responsible for a child or young person,
- are aged at least 16 and are receiving or have recently received a qualifying sickness or disability related benefit and have a disability that puts them at a disadvantage of getting a job, or
- are over 50 and going back to work after being on a qualifying out-of-work benefit for at least six months.

Otherwise it is extended to people who are aged 25 and over who work 30 hours a week or more.

CTC is made up of the following elements,

- **Family element:** which is the basic element for families responsible for one or more children or qualifying young people, with a higher rate of family element known as the baby element to families with one or more children under one year old
- **Child element:** which is paid for each child or qualifying young person the claimant is responsible for
- **Disability element:** for each child or qualifying young person the claimant is responsible for if they get Disability Living Allowance for the child
- **Severe disability element:** for each child or qualifying young person the claimant is responsible for if they get Disability Living Allowance (Highest Care Component) for the child

Some out-of-work families with children do not receive CTC but instead receive the equivalent amount via child and related allowances in Income Support or income-based Jobseeker's Allowance (IS/JSA). These families are included in the figures, generally together with out-of-work families receiving CTC. In due course, they will be "migrated" to HMRC and paid via the tax credits system.

WTC is made up of the following elements,

- **Basic element:** which is paid to any working person who meets the basic eligibility conditions
- **Lone Parent element:** for lone parents
- **Second adult element:** for couples
- **30 hour element:** for individuals who work at least 30 hours a week, couples where one person works at least 30 hours a week or couples who have a child and work a total of 30 hours or more a week between them where one of them works at least 16
- **Disability element:** for people who work at least 16 hours a week and who have a disability that puts them at a disadvantage in getting a job and who are receiving or have recently received a qualifying sickness or disability related benefit
- **Severe disability element:** for people who are in receipt of Disability Living Allowance (Highest Care Component) or Attendance Allowance at the highest rate.
- **50 plus element:** for people aged 50 or over who are starting work for at least 16 hours a week after being on qualifying out-of-work benefits for at least 6 months
- **Childcare element:** for single people who work at least 16 hours a week or couples who both work at least 16 hours a week and who spend money on registered or approved childcare

Tapering: is the amount of the award that will be reduced when the household income exceeds a given threshold. Tapering reduces WTC first, then CTC, then finally the Family Element

The amount of support an eligible family can receive (known as their *entitlement*) varies depending on their income and which tax credit elements they are eligible for. First, a family's maximum possible entitlement is worked out by adding up all the different elements of CTC and WTC they are eligible for (described on page 2).

A household's actual entitlement is then determined by tapering this maximum amount according to different thresholds. As demonstrated within the diagram below, families eligible for the WTC receive the full entitlement until their annual household income reaches £6,420, after which the amount of tax credits they receive is reduced by 39 pence (the 'first taper') for each additional £1 they earn beyond this threshold.

Once the WTC and child element have tapered out, there is a plateau (termed 'family element only') as the family element of the CTC does not begin to be tapered until annual household income exceeds £50,000, over which entitlement to tax credits is reduced by 6.67 per cent of income (the 'second taper') above that threshold.

If a household is out-of-work and therefore eligible for the CTC only, they will receive the full entitlement until their annual household income reaches £15,575 (2008-09). After this point, the amount of tax credits they receive is again reduced by 39 pence for each additional £1 of income beyond this threshold (note that this is not shown on the diagram below).

Because of the range of possible eligibilities and interactions between the elements, both the maximum award and the shape of the above award profile will be different for every family with different circumstances.

Tax Credits are based on household income. The income used to calculate the award is based on the families' income from the previous tax year, or on their most recently reported circumstances in-year. A family's tax credits award is provisional until finalised at the end of the year, when it is checked against their final income for the year. This publication relates to the finalised position of tax credit support.

What does this publication tell me?

The finalised awards are currently published in May around one year following completion of the entitlement year in question. The delay in publication is the result of the finalisation process built into the Tax Credits system. Most families have until *July 31st* following the end of the entitlement year to renew their award reporting their finalised income for the year in question. However, families that report income from Self-Assessment (e.g., the self-employed) have until *January 31st* of the following year to finalise their income. As a result, the full picture is not known until at least February the year after the entitlement year ends and consequently publication is delayed until May. These are National Statistics and the month of publication is pre-announced a year in advance with the exact date being published in the preceding publication.

Each release consists of four publications: the main publication, a supplementary payments publication, and the accompanying geographical publications. The statistics in this release include analysis at

- Country and English Government Office Region (GOR);
- Local Authority (LA);
- Westminster Parliamentary Constituency; and
- Scottish Parliamentary Constituency;

This series has been produced annually since the introduction of Tax Credits in April 2003.

Small Area Statistics

Estimates are also provided in a separate publication at Lower Super Output Area and Data Zone for England, Scotland and Wales. These statistics are available

here: <http://www.hmrc.gov.uk/stats/personal-tax-credits/ctc-small-areas.htm>

The small area statistics are based on the finalised award position, but using a family's circumstances as at 31st August rather than as an average across the year. This ensures that the statistics are directly comparable to other published small area statistics, such as Child Benefit.

Who might be interested?

The statistics contained in this publication will be of interest for anyone that is looking for the most comprehensive data on Tax Credits. Specifically, there are aggregate statistics on who is getting what level of tax credits support and the amount of that support, as well as breakdowns of both by various sub-categories - e.g., family composition, family income, work status, and geographical analyses. It may be of interest to academics, think-tanks, political parties interested in the twin aims of Tax Credits: eradicating child poverty and improving work incentives. Equally it may be of interest for people considering wider questions on government support systems and/or others designing benefit systems. Finally, the geographical analyses might be of interest at the more local level, giving some indication of the level of government support in each Government Office Region/Local Authority level.

Which publication should I use?

If you are interested in looking at the level of tax credits support or are content with less timely tax credit population statistics, use this finalised awards data publication. If you are more concerned with getting the latest up-to-date information about tax credit claimants, that may not align exactly with finalised data further down the line, use the provisional awards data. Sticking to the finalised award data will also mean the figures will align with other published data on Tax Credits such as information in HMRC's Departmental Accounts.

Provisional awards vs. finalised awards

It is important to recognise that the finalised awards statistics are not a revision of the provisional statistics. The provisional numbers relate to the caseload position at a snapshot point in time, based on the family circumstances we have been informed of by each family prior to that particular time. The finalised awards relate to the complete retrospective picture for the year, based on a finalised view of family incomes and circumstances. The caseload population will be different between the two publications as a result of HMRC knowing the complete finalised picture of the award.

At the start of the year, the tax credit award will be a provisional award reflecting the reported circumstances as at April 6th (the start of the tax year). Over the course of the year, a family's circumstances may or may not change. As and when a family's circumstances change, the provisional award is updated each time with the latest set of circumstances and a new provisional award re-calculated. It is only at finalisation (usually four to nine months after the end of the tax year) that the family's circumstances for the whole year are known and a finalised award can be calculated. As a result, the finalised award statistics are not available until around 12 months after the end of the entitlement year in question. Given this lag in availability of data, there is some value in looking at a snapshot of families' circumstances at any given time to give some indication of the level of support one might expect to see subsequently at finalisation.

To illustrate the difference, let us look at a family that has one change of circumstance throughout the year, moving from in-work to out-of-work in January of any one year:

The snapshot data looking at the provisional award in December will model entitlement for the whole year on the basis that the family is in-work for the whole year (since we do not know about the move out-of-work at that time). It is not until finalisation - and thereby in the finalised award data publication - that the family's entitlement will be modelled on the basis of 9 months in-work and 3 months out-of-work.

So the figures for provisional awards are more up to date, but are subject to retrospective change. The sizes of these changes can be seen by comparing the data for selected dates in finalised awards with data published earlier on provisional awards at the same snapshot dates. The provisional award data tables classify families according to the levels of their entitlement at the reference date, modelled from data on their circumstances and their latest annual incomes reported and processed by that date. The actual amount being received at that date can be lower, due to the recovery of earlier overpayments. The tables describe as "recipients" all families with positive modelled entitlement, though in some cases the payments are reduced to zero. For more details, see the Technical Note.

What information do the tables contain?

CTC and WTC are claimed by individuals, or jointly by couples, whether or not they have children (described as "families" in this publication). These tables cover families who had claimed, and were eligible for, CTC (or the equivalent via benefits) or WTC for all of or part of 2008-09.

These tables show details of finalised 2008-09 Child and Working Tax Credit awards to families in each country of the UK, in each region of England, in each local authority (county, district and unitary authority) and in each Westminster and Scottish Parliament constituency. They show the numbers of awards, the numbers underpaid and overpaid at 5 April 2009, and the aggregate amounts of underpayments and overpayments.

The tables are consistent with the national figures of families with positive 2008-09 entitlements shown in "Child and Working Tax Credits Statistics Finalised Annual awards 2008-09", which contains details of the sources and definitions of the figures.

Out-of-work families

A family is defined as being out-of-work at the reference date if both adults, or the single adult, does not work for at least 16 hours per week, these families can fall into two categories:

- 1) Families administered by HMRC who are receiving their child support through CTC
- 2) Families administered by DWP and claiming their child support through benefits

Child Tax Credit was introduced in April 2003 and any application since then falls under 1), whereas families who were receiving out-of-work benefits prior to April 2003 and remain so will fall under 2) – with a policy to eventually migrate all out-of-work cases over to HMRC in time. Therefore, out-of-work caseload numbers falling under 2) is an ever decreasing population.

All the tables in this publication include all out of work families, irrespective of the source of their support.

User Engagement

Bespoke analysis of tax credits data is possible although there may be a charge depending on the level of complexity and the resources required to produce. If you would like to discuss your requirements, to comment on the current publications, or for further information about the tax credits statistics please use the contact information at the beginning of this publication, or from the HMRC website:

http://www.hmrc.gov.uk/stats/update_calendar/enquiry_2.htm

We are committed to improving the official statistics we publish. We want to encourage and promote user engagement, so we can improve our statistical outputs.

We would welcome any views you have using the link to the feedback form below. We will undertake to review user comments on a quarterly basis and use this information to influence the development of our official statistics. We will summarise and publish user comments at regular intervals.

<http://www.hmrc.gov.uk/stats/user-engagement.htm>

Appendix A : Technical Note

Data source, definition and quality

The figures in the table are derived from a scan of the tax credits computer system, taken in early April 2010. For each 2008-09 award, the scan contained the aggregate of each of (a) 2008-09 entitlement postings up to 5 April 2010, and (b) payments and other transactions for 2008-09 posted up to 5 April 2009 (but including, exceptionally, manual payments for 2008-09 issued in 2008-09 and posted during 2009-10). The sums of the posting amounts taken over all awards were consistent with separate aggregates derived from other scans of the system.

Payments received direct from claimants to settle 2008-09 overpayments identified in-year are included at (b) above if they were posted to accounts by 5 April 2009.

These data in the scan were generally those used to issue payments and award notices to tax credits claimants, and to recover overpayments. A small number of awards were handled clerically, and the computer system may have out of date or incorrect data. Some payments made in 2008-09 were not recorded on the computer system, such as manual payments issued in 2008-09 but not posted to accounts by April 2010. However, the numbers and amounts involved are extremely small.

By definition, the data exclude payments made after 5 April 2009, even if these were the sole cause of, or increased, 2008-09 overpayments as measured at a later date.

How overpayments and underpayments arise

During 2008-09, payments were based on the latest information reported on the family's circumstances (hours worked, number of children, disabilities, childcare costs) and income. Families were encouraged to report any changes when they occurred, and in-year estimates of 2008-09 incomes. Payments were then adjusted so that, as far as possible, the new calculated annual entitlement was paid over by 5 April 2009.

Most underpayments and overpayments arose through no 2008-09 incomes being reported until finalisation in 2009-10¹. They also arose when claimants failed to report changes of circumstances until after the year end; or when changes (or estimated 2008-09 incomes) reducing entitlement were reported in-year but there was insufficient time to reduce payments in the rest of the year to prevent an overpayment. They could also arise through official error.

Terminated awards

Terminated awards were identified as those with no entitlement sub-period in the scan used for the main publication "Child and Working Tax Credits. Finalised awards. 2008-09". Only such awards with positive payment postings are included in the tables.

2008-09 awards are described as "Terminated" if the families (a) failed to report by the specified date their actual 2007-08 incomes or other details, (b) according to the latest information, ceased to meet the qualifying conditions for tax credits² before the start of 2008-09, or (c) failed to return a signed 2008-09 award notice,

The entitlements of such awards are set to zero. The awards are included in the tables if payments for 2008-09 were made during 2008-09, and not fully recovered (and not remitted) in 2008-09; they are by definition overpaid at 5 April 2009.

¹ Initial awards were based on 2007-08 incomes. The first £25,000 of any increase in income between then and 2008-09 was however disregarded.

² Responsible for children; or including an adult who was a disabled worker, returned to work in the last year aged 50+, or was aged 25+ and worked for 30+ hours per week.

Repayments of underpayments, and overpayment recovery

Underpayments are repaid as lump sums. Overpayments are recovered by reducing future payments, or directly if there are no current payments. For further details, see the HMRC Code of Practice 26, "What happens when we have paid you too much tax credits?" This also explains remitting overpayments arising from official error.

Disputed overpayments, remissions and recovery suspension

Overpayments remitted due to official error are included in the tables unless remitted by 5 April 2009. The recovery of overpayments can also be suspended pending investigations or decisions; these overpayments are included in the tables even if the suspension was active at 5 April 2009.

Overpayments arising after the year end, and from unposted payments

The data used to compile the main tables exclude (a) manual payments issued in 2008-09 but not posted to customer accounts by 5 April 2010 and (b) payments and other transactions for 2008-09 made after that date.

Aggregates including these transactions, and the equivalent figures for 2003-04 to 2007-08, are shown in the Main Aggregates page of the accompanying non-geographical publication. They are not measures of overpayments at 5 April at the end of each year. Rather, they approximate the sum of the maximum amounts for each award on or after that date. The figures are heavily rounded, reflecting the fact that they are approximate. They fall outside National Statistics.

Small underpayments and overpayments

68 thousand awards were underpaid, and 33 thousand overpaid, by less than £10 (excluding amounts under £1). Many of these amounts arose from rounding within the award calculation and payment. We have judged that users would prefer the figures of underpaid and overpaid awards to exclude these cases.

Families and awards

Tax credits awards are made to single adults or couples. No adult can be in more than one current award; when a couple breaks up, or a single adult becomes part of a couple, the award ceases and either or both adults can apply for new awards.

The main publication shows the average number of benefiting families in 2008-09, which is the same as the number of awards with positive entitlement averaged over the year. These tables cover all 2008-09 awards, so individuals can be represented more than once.

To give some information on families, however, several tables distinguish between (a) families with awards current at 5 April 2009 and (b) other awards. The latter comprises awards terminated, ceased by 5 April 2009, or made only in 2009-10 and backdated.

The coverage of out-of-work families with children

The tables in the main publication include out-of-work families receiving their child support via Income Support or income-based Jobseeker's Allowance. This publication is restricted to tax credits awards, and so excludes payments, underpayments and overpayments of these benefits.

Appendix B : CTC and WTC elements and thresholds

	Annual rate (£), except where specified					
	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09

Minimum award payable	26	26	26	26	26	26

¹ Payable to families for any period during which they have one or more children aged under 1.

² Payable for each child up to 31 August after their 16th birthday, and for each young person for any period in which they are aged under 20 (under 19 to 2005-06) and in full-time non-advanced education, or under 18 and in their first 20 weeks of registration with the Careers service or Connexions.

³ Payable in addition to the child element for each disabled child.

⁴ Payable in addition to the disabled child element for each severely disabled child.

⁵ Payable for any period during which normal hours worked (for a couple, summed over the two partners) is at least 30 per week.

⁶ Payable for each qualifying adult for the first 12 months following a return to work.

⁷ Income is net of pension contributions, and excludes Child Benefit, Housing benefit, Council tax benefit, maintenance and the first £300 of family income other than from work or benefits. The award is reduced by the excess of income over the first threshold, multiplied by the first withdrawal rate.

⁸ For those entitled to the Child Tax Credit, the award is reduced only down to the family element, plus the baby addition where relevant, less the excess of income over the second threshold multiplied by the second withdrawal rate.

⁹ Those also receiving Income Support, income-based Jobseeker's Allowance or Pension Credit are passported to maximum award with no tapering.
