Notes on the Table

Profit-related pay, March 1994 to March 2000

1. The information is obtained from the application forms submitted by employers who have successfully registered their schemes with the Inland Revenue. Employers are asked to select the most appropriate business activity from a list of broad categories.

2. The figures for the number of live schemes excludes any registration, which at the dates given had already been, cancelled or - in the case of schemes of a limited duration - had already expired. Also excluded are scheme renewals registered in advance of the original scheme's expiry or schemes registered in advance of their start dates.
